WHY CHOOSE US

Specified by some of the world's leading brands, Intelligent Glass has had the pleasure of being involved with a collection of the most creative and exciting installations the industry has ever seen. From award winning architecture projects, to unveiling premium luxury cars, we have seen switchable technology excel in a wide range of environments for an extensive range of clients.

PRIVACY ON DEMAND

With the most comprehensive range of solutions on the market, our vision is to create a world with privacy on demand. Switchable Glass and Film operates on an electrical principle switching from frosted to clear at the flick of a switch. Switchable Glass technology offers a CE certified and Eco friendly solution providing solar reduction by up to 40%.

SWITCHABLE GLASS

Switchable Glass technology is available in a number of formats to suit a wide range of applications. The range includes laminated and double glazing where the Switchable element is incorporated within the glass or alternatively toughened glass where the switchable layer is coated onto the surface of the glass. Specialist solutions are also available, combining Switchable Glass technology with Sound Insulating Acoustic Glass, Fire Rated Safety Glass and Coloured Switchable Glass.

SWITCHABLE FILM

Our self-adhesive Switchable Film offers the ideal solution for the retrofit market. Simply peel and stick the film to any existing glazing. We also offer a non-adhesive version ideal for lamination by specialist glass processors.

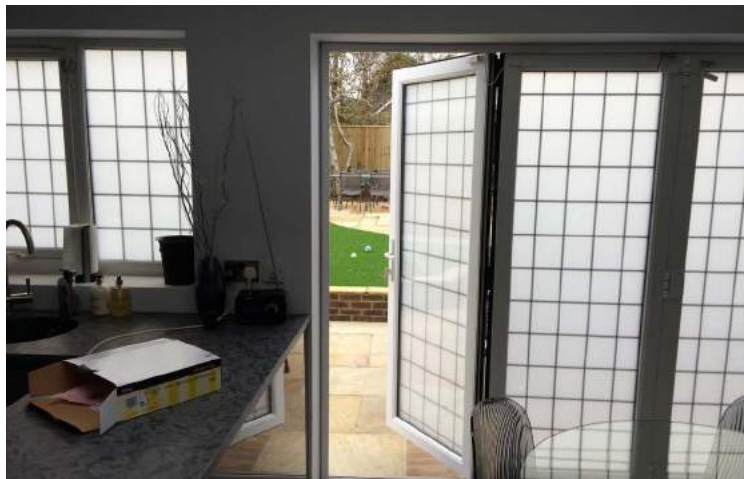

SWITCHABLE VISION PANELS

The Switchable Vision Panel allows discreet visibility into (or out of) a room at the push of a button. Powered by a replaceable AA battery pack which is concealed within the door, the panels work independently of mains power, offering excellent flexibility and privacy on demand.

RESIDENTIAL

Why not install Switchable Glass and Film at home. Applications include dividing partitions, external glazing, vision panels, sky lights, shower screens and bi-fold doors.

COMMERCIAL

The commercial sector represents the biggest market for Switchable Glass and Film with many of the world's largest corporate brands opting for Intelligent Glass.

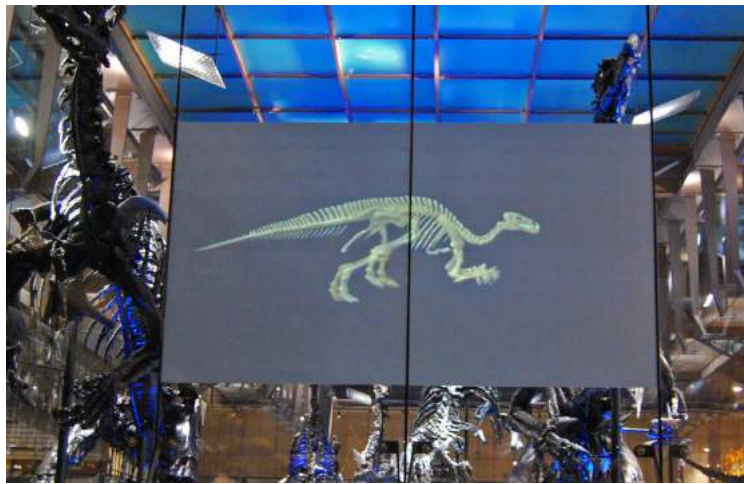

HOSPITALITY

Switchable Glass and Film provides the ideal solution for many hospitality requirements. Dividing wall partitions, shower rooms and door privacy panels are just a few examples demonstrating the versatility of Intelligent Glass.

HEALTHCARE

Serving as a more hygienic solution compared to privacy curtains, Switchable Glass and Film is also a lot easier to clean and maintain, saving healthcare staff valuable time. The latest innovations from Intelligent Glass only enhance what is possible with switchable technology, which is now available as Sound Insulating Glass for the ultimate privacy solution or even touch interaction to assist with healthcare education.

AUDIOVISUAL

In its frosted state, Switchable Glass and Film can also be used as a 4K / HD rear projection display and is often used for product or window displays, movie sets, churches and museums from all around the world. Interactive touch options are also available on request.

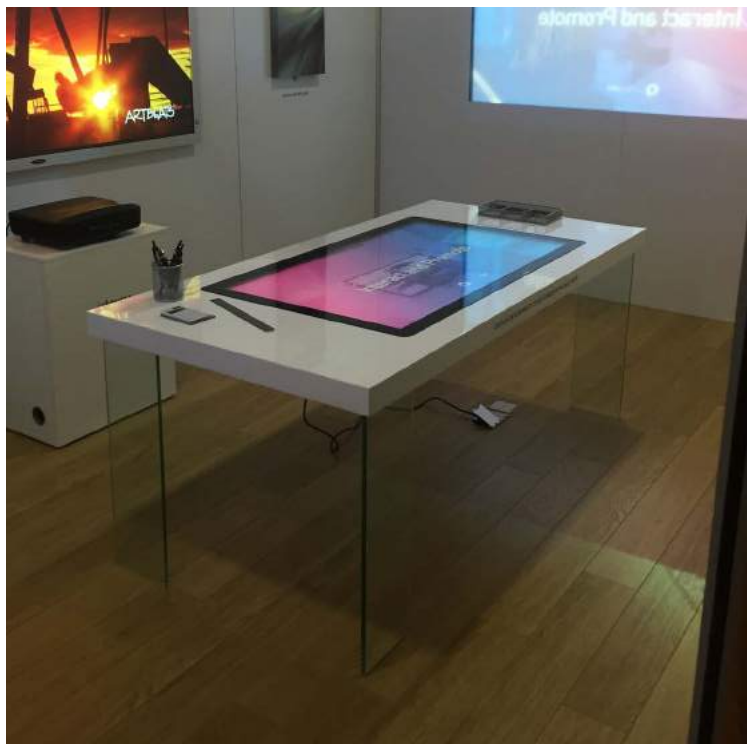

SPECIALIST

Our Switchable Glass and Film is specified for a number of specialist applications including car showrooms, TV news studios, theatres, furniture, display cases, window displays, yacht / marine and automotive, to name a few.

The **SCREENGALLERY**

The Screen Gallery provides you with an opportunity to share in our vision and see some of the innovative technology Pro Display, Intelligent Glass and intouch have to offer. Visits are by invitation only, so if you would like to see our products in action, please enquire today.

THE PRO DISPLAY GROUP

The Pro Display Group consists of Pro Display, Intelligent Glass and intouch. Pro Display, the division at the forefront of The Group's prestigious repertoire manufactures an innovative range of AV and Digital Signage solutions designed to advertise, inform and entertain. intouch, on the other hand, focuses on interactivity, bringing you the future of multi-touch today, supplying a range of solutions designed for new installations and retrofit applications.
