

## Switchable Laminate Glass

Switchable Laminate Glass provides a robust solution where the switchable interlayer is laminated in between 2 panels of toughened glass making this the ideal choice for public areas or applications where the glass could be exposed to moisture.

The seamless nature of laminated glass allows for panels to be installed side by side without the need for any vertical frames creating a sleek and minimalist effect. This product offers edge to edge privacy unlike competing Switchable Glass technologies where there is a noticeable clear area around the edges of the glass.

Switchable Laminate Glass is available in 12mm or 14mm thicknesses as standard in panel sizes up to 1.8m x 4m\*. Custom thicknesses and panel sizes are available on request.

### Specifications

- Thickness – 12mm or 14mm
- Sizes – Up to 1.8m x 4m
- Voltage – AC 48-65V
- Power Consumption – 5W per m2
- Current – 0.1 amperes per m2

### Benefits

- Edge to edge privacy
- Robust laminate safety glass
- Enhanced acoustic properties
- Custom sizes and thickness available
- Smart home compatible

### Applications

- Glass walls
- Frameless doors
- Bathrooms
- High traffic areas
- Healthcare partition

\*Switchable Glass dimensions are subject to a tolerance of +/- 3mm.
